## RELEVANT EXPERIENCE

---

### Protoss Technology

June 2024 - October 2024

Software Engineer Intern

Bangkok, Thailand

- Maintained, Fixed and added features for a logistics management application serving real customers on a legacy codebase using Vue, Flutter, Adonis and MySQL. Worked within an agile Scrum framework to improve system functionality and user experience
- Designed, developed and integrated a chat system in a month from scratch using Socket.IO and Firebase, creating a scalable real-time communication platform between mobile and desktop users with image sharing, notifications, and message tracking capabilities

### Faculty of Humanities, Chiang Mai University

December 2020 - January 2021

IT Support Intern

Chiang Mai, Thailand

- Provided technical support and troubleshooting for client computers and electronic devices, resolving hardware and software issues efficiently

## EDUCATION

---

### King Mongkut's Institute of Technology Ladkrabang

B.Sc. Information Technology, Minors in Software Engineering

Bangkok, Thailand

### Chiang Mai Technical College

Vocational Diploma - Information Technology

Chiang Mai, Thailand

## SELECTED PROJECTS

---

### hor-mahalai-kmitl-project

- Developed a web application for dorm managers and potential renters using Vue.js frontend with Express.js and Prisma as backend

### Billionaire Store

- Designed and led a development team in creating a semi-ERP/CRM system using Java Springboot in microservice architecture such as inventory management, customer relations, and business operations

## OTHER SKILLS

---

- Proficient usage of Windows, Linux, Microsoft Office and editing tools such as Photoshop, Premiere Pro, Sony Vegas and Illustrator
- Strong analytical thinker, quick and eager to learn new tools and highly adaptable to change
